[www.linkedin.com/in/vinay-kumar-mandalapu](http://www.linkedin.com/in/vinay-kumar-mandalapu) (LinkedIn)

## Top Skills

Artificial Intelligence (AI)  
Deep Learning  
Machine Learning

## Certifications

AI Fundamentals  
AI Skills Fest 2026  
SAP Professional Fundamentals  
Introduction to Generative AI for Developers With Copilot  
Certificate of completion: Claude 101

# Vinay kumar Mandalapu

AI/ML Engineer | Python | AI | ML | SQL | Building Real-World AI Systems | Open to Work | Let's Build Together  
Hyderabad, Telangana, India

## Summary

I'll be honest. I didn't fall in love with coding right away. Like many students, I started learning programming because it was part of my curriculum. But everything changed when I began building projects and saw how code could solve real-world problems. What started as curiosity gradually turned into a strong interest in Artificial Intelligence, Machine Learning, and Deep Learning. My learning journey has been driven by hands-on projects. I worked on a Bitcoin Price Prediction system using Machine Learning algorithms like Logistic Regression, SVM, and ARIMA to analyze market trends and forecast price direction. This project helped me understand data preprocessing, feature engineering, model evaluation, and the practical challenges of predictive analytics. As my interest in AI grew, I moved into Deep Learning and Computer Vision. I built a Fruit Freshness Classifier using TensorFlow and Convolutional Neural Networks to identify fresh and rotten fruits and vegetables. I also developed a Bank Customer Churn Prediction system using Artificial Neural Networks to predict customer retention behavior. I enjoy working on complete machine learning solutions. One of my recent projects involved building an Enterprise E-Commerce AI and Retention Engine. This engine combined customer segmentation, churn prediction, and customer lifetime value forecasting using Machine Learning techniques. Along the way, I've developed skills in Python, Machine Learning, Deep Learning, TensorFlow, Scikit-learn, SQL, Data Analysis, and Model Deployment. More importantly, I've learned how to approach problems, experiment with solutions, and continuously improve through practice. I'm currently focused on strengthening my expertise in AI Engineering, Machine Learning, Deep Learning, and Generative AI while building practical projects that connect learning with real-world applications. If you'd like to connect, collaborate, or discuss AI, Machine Learning, and technology, feel free to reach out.

## Education

Siddhartha Institute of Engineering & Technology.

Bachelor of Technology, Computational Science · (2022 - 2026)
